Risk-based Monitoring, trends in the model implementation

In 2014 the BVMA supported by EUCROF members conducted a survey among CRAs in Europe to get a picture about their experience with risk-based monitoring (RBM) and their assessment of the processes. Now, 2 years later, the survey was repeated. The presentation will show and discuss the results of this second survey and analyze the progress and challenges of RBM adoption in the viewpoint of the CRAs.
